## Evaluation questionnaire

for participants of the Ulam Programme Projects selected during the call for proposals in 2021:

Dear Ulam Programme Scholarship Holders,

this survey aims to learn about these effects of your projects implemented under The Ulam Programme, which were difficult to present in the final report, as well as to know your opinion on the stay in Poland and the programme, and also to collect proposals for possible modifications of the programme. The survey is not anonymous, however your individual answers will be available only to the NAWA unit dealing with the evaluation of the Agency's activities, while the other NAWA divisions will be able to view the results of the survey only in an anonymized form (without possibility of identification of the authors of the presented opinions).
